SUMMARY

Software Engineer with 4+ years of experience building scalable web and mobile applications using React.js, Next.js, and Node.js across e-commerce, sports betting, and internal business systems. Proven impact includes 6x crawling throughput, 85% latency reduction, and 40% faster API response times. Proficient in full-stack development, API integration, performance optimization, and AWS services.

EXPERIENCE

Software Engineer

AiOdds

📅 04/2025 - Present

- Developed multi-provider sports data crawling system, reducing crawling costs by 30% and increasing throughput from 200 to 600 req/s
- Optimized sports data ingestion pipeline, reducing average latency from 800ms to 120ms under peak load
- Debugged and resolved critical data-sync issues in the betting pipeline, preventing incorrect odds display for live matches
- Mentored freshers during onboarding, helping them adapt to project architecture and workflow

Software Engineer

Zigvy Corporation

📅 08/2024 - 03/2025

- Built a clock-in reminder system for 1,000+ employees, automating payroll attendance tracking and reducing manual errors.
- Optimized attendance query API response time by ~40% through database indexing and query restructuring on the backend layer
- Maintained release stability by triaging and resolving 15-20 bugs/week across frontend and backend layers
- Wrote unit tests covering core reminder logic, improving release confidence across sprint cycles

Software Engineer

Guangzhou Double Fish Sports Goods Group Co., Ltd

📅 03/2023 - 08/2024

- Developed SEO-optimized, high-performance applications using Next.js (SSR/SSG)
- Integrated the VNPay payment gateway, supporting 100+ daily transactions with zero post-launch payment errors.
- Built and maintained backend and frontend features for products, orders, payments, sales workflows, and admin dashboards.
- Supported deployment, monitoring, testing, and Vietnam e-commerce compliance processes

Software Engineer

MUHA Technology Joint Stock Company

📅 10/2021 - 02/2023

- Developed cross-platform mobile applications using React Native (CLI & Expo), deployed to App Store and Google Play Store
- Built modern web applications using React.js and Next.js with complex state management and navigation systems
- Integrated REST APIs and managed complex frontend-backend data flows
- Implemented navigation systems, state management, and reusable UI components

SKILLS

React.js	Next.js	Node.js	NestJS
Express.js	REST APIs	AWS	
PostgreSQL	MSSQL	MongoDB
